

Nutrition and Health Claims

Clear Future Ahead

- We do understand the current requirements
- Have a feeling on where the application of the legislation leads us to
- Understand the importance of human studies required
- Opened new directions for future work

Expert Discussion

Learned from Others

- New Contacts
- Introduction to Food and Health in Japan, Hong Kong, China with different traditions options and possibilities of collaboration
- I have been lucky to be able to stand on the shoulders of great researchers to see the future

- Pilar Rodrigues showed us the way to go
- Albert Bär taught us how to
 - make an application for a health claim
 - how to work on the details on the way to successful applications
- All others contributed to the success

Genomics in Nutrition Research

September 11th, 2007

PLoS Biology is pleased to publish the first diploid genome sequence for *Homo sapiens*:

the total personal genome of J. Craig Venter, named one of Time's 100 most influential people in 2007.

**Personalised nutrition to mother and infant
importance of health claims !**

Future is Clear!

- We are never being given a wish,
(this may be a health claim application to EFSA!)

Without being given the power to make it come true.

However, we may have to work for it!

Richard Bach 1992

Special Thanks

- Marjo and her team and the FFF-net
 - Anna, Saara and Saila
- Anna Hillgren

- Thank you for a work well-done!

Thank you for your participation

- We look forward to sharing exciting new discoveries with you again
- Have a safe journey home
